

Workmanship Guarantee and Product Warranty

All GeoTility geothermal installations are engineered, designed and installed to meet or exceed the highest industry standards. To achieve a high worry free return on your investment, GeoTility adheres to providing our installers with current training, state-of-the-art equipment and best working practices to ensure the quality and long term reliability of your geothermal heating and cooling system.

Workmanship Guarantee:

GeoTility Geothermal Installations Corp. hereby certifies that all work included in this contract will meet the requirements of the Provincial Building Code, the International Ground Source Heat Pump Association and Canadian Geo-exchange Coalition.

GeoTility provides a standard warranty of 2 year on all material(s) & installation workmanship.

Product Warranty:

Residential Interior Heat Pump Warranty

GeoTility private branded heat pumps and thermostats carry a 5 year parts and limited labor warranty to include the pump, compressor, fan & all internal components of the GeoTility equipment. This warranty is null and void if alterations or servicing is done by others than GeoTility or any non certified CGC or IGSPHA contractor and/or if proper maintenance is not adhered too, as per the GeoTility homeowners manual.

Residential Ground Heat Exchanger (geo loops)

GeoTility offers an industry leading (10) year materials and workmanship warranty on the installation of the ground heat exchanger to include the loops, header and grouting. The ground heat exchanger warranty covers the parts and repairs, but does not include the costs for excavation, site remediation or other consequential costs.

The high density polyethylene used in geothermal piping has a manufacturer's replacement warranty of 50 years.

Warranty does not cover damage done by others.
